### ExceLight Introduces 10G TOSAs for CWDM Applications

Durham, NC—ExceLight Communications Inc., a subsidiary of Sumitomo Electric Industries (SEI), will be demonstrating new 10 Gb/s lasers for coarse wavelength-division multiplexing (CWDM) at OFC/NFOEC, Booth 2340, in Anaheim on March 27 to 29.

The lasers are packaged in the smallest 10G TOSA available, a mini-TOSA with LC interface for easy design into SFP+ and XFP transceivers. Available in eight standard wavelengths from 1470 nm to 1610 nm, they use SEI's proven distributed feedback (DFB) technology to achieve both exceptional performance and the world-class reliability for which SEI is known. Expanding on SEI's industry-leading line of CWDM lasers for 2.5 Gb/s, the new lasers are ideal for 10 gigabit Ethernet and 8.5G Fibre Channel needs.

OFC/NFOEC attendees can see the CWDM TOSAs operating at the Excelight booth over a 25-km link.

#### **About ExceLight Communications**

ExceLight Communications, Inc., a subsidiary of Sumitomo Electric Industries, is a leading provider of optical components and modules to the telecom, CATV, broadband, and data communications markets. ExceLight offers a comprehensive array of transceivers, transmitters, receivers, lasers, photodiodes, and passive components. Sumitomo's world-class research and manufacturing capabilities in optical technology continue to expand and strengthen the product portfolio while maintaining industry-leading levels of reliability. The well-established global presence of Sumitomo allows ExceLight to provide integrated support to customer facilities throughout the world.
